

CREATIVE PHOTOGRAPHY CERTIFICATE

PRO PHOTOGRAPHY CERTIFICATE

PART TIME

"I've always loved photography. For someone who has been telling her children that they can do anything... I thought it was time I took up the opportunity to pursue my passion."

Anne McCallum, PSC First Year Student

Image by Clytie Meredith

We offer a creative environment that is second to none.

Stand out from the crowd

It seems everyone thinks they're a photographer and images are everywhere! At PSC we know the essence of professional image making and how you can get your images to stand out from the crowd.

If you love photography and want great results or dreaming of a career change then our part time course options are for you!

You learn creative practice, professional technique and to step outside your comfort zone. You discover how to see in more creative ways, use light to create mood and really start to use your camera and workflow like a professional.

Perfect blend of the creative and technical

Our course has the perfect blend of the creative, the technical and in class reviews – so you learn in a fun, dynamic and professional way.

You meet people who also love photography, get tangible feedback on your photography and your creative process.

It's exciting, enjoyable and often can be life changing... our experience shows this is how you make great photographers!

Experience our dynamic content

Experience the latest professional techniques and second to none specialised facilities in our dynamic face-to-face classes.

In our **Pro Photography Certificate** course there's an emphasis on face to face seminars, group tutorials and intensive workshops together with self-directed shooting and constructive feedback.

Whether you're a beginner or a more experienced, you'll be inspired and learn how to take your photography to the next level.

Students require

A DSLR camera with a removable on-camera flash, portable hard drive, a subscription to Adobe Creative Cloud for photographers (student discount) and a laptop computer.

Course dates start

Option 1	29 June 2018 - Day classes
Option 2	02 July 2018 - Evening classes
Option 3	17 July 2018 - Evening classes

Get started

Creative Photography Certificate

20 WEEK PROGRAM

Creative camera and Digital Editing

20 sessions (3 hrs)

Be inspired through gaining confidence while beginning to master your camera to produce images that reflect your passion for photography. In this program you will learn how to use your camera for creative effect, explore light and colour along with essential camera techniques to give you control of your outcomes. You will also learn how to use image-processing software to make your images look their best.

Composition, form and perspective/ image interpretation

8 sessions (3 hrs)

What makes a photograph great? Learn how to correctly place your subjects and make dynamic compositions that will hold your viewer's attention. You will gain insights into the visual principles that make images timeless and memorable. You will also gain an understanding of how to not only employ these devices in your photography, but to also choose your best shots.

Location, lighting & people photography

Delivered over a weekend; on location

Photograph on location and discover what it's like to complete a series of short assignment briefs involving people and landscape. You will learn how to take a more interpretive approach to your photography and tell stories with a sequence of images. Your teacher will be there to provide guidance and feedback.

Students who complete the Creative Photography Certificate gain prior learning credits towards the Pro Photography Certificate course.

Pro Photography Certificate

40 WEEK PROGRAM (First 20 weeks includes the Creative Photography Certificate)

Folio project: Advanced shooting styles & camera application

20 sessions (3 hrs)

Learn how to extend your camera practice and gain confidence in photographing with purpose and intent. This program introduces you to the traditions of the photographic genres and how to apply them to create considered and dynamic imagery. Through defining an area of interest, you will produce your own professional-standard portfolio.

Manage digital images/digital aesthetics

8 sessions (3 hrs)

Learn new post-production techniques and begin to develop a visual style for your photographs. Gain confidence in editing and retouching using Adobe Creative Cloud software and manage your files and workflow to produce your own digital prints.

Explore mixed lighting & mood

Delivered over a weekend; location and studio lighting

Discover and explore the light and mood of Melbourne's fabulous spaces! Master photographing under different lighting conditions. This intensive, practical program introduces you to a range of portrait lighting styles, working with Speed-lights, off-camera flash and advanced light-modifying techniques.

Students who complete the Pro Photography Certificate gain prior learning credits towards the accredited Advanced Diploma of Photography.
