

Online Course Creative Photoshop Skills

Are you new to Photoshop?

Creative Photoshop Skills Online Course

PSC's new online 12 week course is suitable for beginners and intermediate Photoshop users allowing you to fit your learning around your lifestyle and busy schedule! You can work at your own pace and interact with your teacher and other students as part of a shared online learning environment and experience.

If you want to know more and unlock the impressive power of Photoshop, the Creative Photoshop Skills online course provides you with some of the essential skills you need to take your photography to the next level.

This course provides a combination of real world image editing examples and step by step projects from internationally recognized author, Photoshop expert and Adobe Photoshop Ambassador, Mark Galer.

Why are these skills so important?

Photography is a holistic process that combines the skills of image capture with those of post-production image editing. Editing an image is how photographers have historically been able to 'tell their story' and express their emotions. Increasing your post production skills with Photoshop will enable you to express your own unique vision of the world we live in.

“This course taught me many useful Photoshop techniques and tips for making quality composite photographs” – Louisa

Another great benefit – as a PSC student you can subscribe to Adobe CC at a discounted student rate. You can do this through the PSC student portal once you have enrolled.

Who is PSC?

Photography Studies College (Melbourne), is Australia's leading contemporary tertiary photography college. For over 40 years PSC has delivered specialised, high quality and innovative photography education, consistently producing graduates of the highest calibre. PSC has built a leading reputation for producing high quality, creative and award winning students and is the first choice for many when looking for a specialised, stimulating and industry relevant learning experience.

If you are interested in finding out more about one of our accredited courses upon completion of this course just visit our website www.psc.edu.au for details of full time and part time courses.

Want to master editing techniques and achieve professional results?

Learning online

At PSC our teachers are committed to assisting you in your learning throughout the course. For the Creative Photoshop Skills course your teacher will be one of the world's most experienced online Photoshop teachers Mark Derbyshire. Through his wealth of experience Mark has created the best online classroom interface for learning Photoshop post-production editing.

The assignments you submit will assess your technical understanding of how to best edit images in Adobe Camera Raw and the full editing space of Photoshop CC.

Your teacher will offer advice on the optimum capture workflows as well as post-production editing techniques so that all students achieve a higher level of craft and become better photographers.

The assessment for this course is objective (technical proficiency) rather than subjective (artistic merit) although we encourage creativity and critical debate in the online class forums in relation to conceptual thinking and aesthetics.

“Instructions were clearly defined and easy to follow” – Craig

Course requirements

You will be required to capture images using the RAW file format using a DSLR or Mirrorless camera system. You will need access to Photoshop through the Adobe CC. Access to a tripod and flash is also recommended, but not essential.

To enrol

To enrol just go online at www.psc.edu.au, click the button – Online Creative Photoshop Course – and complete the enrolment and payment checkout process. Cost: \$600

For any further information contact info@psc.edu.au or Phone: +61 3 9682 3191

“Photoshop is constantly evolving and the course demonstrates exercises using the most up to date techniques.” – Elma
